Career Objective

Passionate Computer Science and Design graduate with knowledge of full-stack development, including frontend and backend technologies. Experienced in building web applications and RESTful APIs, with a strong interest in developing scalable and maintainable software. Seeking an entry-level software engineering role to learn, contribute and grow in a collaborative tech environment.

Education

MVJ College of Engineering , Bangalore	2021 – 2025
• B.E. in Computer Science and Design	CGPA: 8.34
Prism PU Science College , Dharwad	2019 – 2021
• Pre-University Course (PCMCs)	Percentage: 82%

Experience

Web Developer Intern – Dotch Endeavours Pvt. Ltd. Mysuru	Sept 2024 – Jan 2025
• Built a scalable food ordering platform with an integrated admin dashboard for real-time order tracking, streamlined order management, and efficient user lifecycle and support ticket handling.	

Projects

ServiceFlow

- Developed a location-based service hiring platform with Maps API integration for radius-based provider discovery, real-time chat (Redis), booking management, and ratings/reviews.
- Implemented DeepFace-based face verification for secure provider onboarding, enabling trusted profiles and enhancing overall platform reliability.

RentlyTools – Peer-to-Peer Equipment Rental Platform

- Built a peer-to-peer equipment rental platform with booking workflows, wallet system, owner verification, Cloudinary media handling, and location-based equipment discovery.

BodyFat Intelligence – ML Health Prediction Dashboard

- Built a Random Forest-based body fat prediction system with dual prediction modes and an interactive Gradio dashboard for real-time predictions and feature importance insights.

Skills

Languages: Java, Python, SQL, JavaScript.

Technologies:

- **Backend:** Spring Boot.
- **Frontend:** ReactJS, HTML, CSS
- **Tools:** Redis, Git, Postman
